REINLAND EQUIPMENT AUCTION

THANK YOU FOR TRUSTING US WITH YOUR Business!

For over 60 years Reinland Auction has served as a trusted auction source for the Inland Empire.

We want to take this time to say how much we appreciate our consignors and bidders. Through the years, many of you have become valued friends as well.

We are retiring!

It's time for us to make time for travel, fun and relaxation.

Thank you so very much!

Free Depot Days Car Show - Northern Pacific Railroad Museum Event

Center Of The Universe - 600 Bank Street, Wallace

Every year in May we celebrate the anniversary of the Depot's move, the day before Mother's Day, with the Depot Day Classic Car Show. On Saturday, May 11 from 10:00 AM to 3:00 PM. Depot Day is always the Saturday before Mother's Day in May. Vendors on the lawn, cars on the streets, & lots of fun for everyone! The streets of Wallace are closed & filled with classic cars. Unique food booths & eclectic vendors fill the Depot Lawn. We hope you can come join the fun, look at the cars, & listen to some great music at the next Depot Day Celebration. Its a great time for all ages! The Depot Day Car Show is a major fundraiser for the Northern Pacific Depot Foundation. Whether you're a Classic Car or Railroad buff, its a wonderful excuse to come out & show your support for the Depot! Register with the Northern Pacific Railroad Museum here: <https://npdepot.org/annual-events-2/#car-show>

CREATURE FEATURE

SEAHORSES

Found in shallow, tropical waters all over the globe, the seahorse is a beautiful and graceful creature. They are very poor swimmers and so they use their tails to grip on to plants and other elements of their environment. Most pet seahorses are captive bred, and the seahorse and it's similar looking cousin, the pipefish, adapt well to captivity.

LIFE SPAN:
Approx. 2-5 Years

DIET:
Frozen Mysis & Brine Shrimp

DIFFICULTY:
SET-UP
Moderate

CARE ROUTINE
Moderate

COST OF UPKEEP
Moderate

AVAILABILITY
Moderate

ADULT SIZE:
Approx. 4-11 Inches

HOW MANY:
Groups or Pairs

HABITAT:
Seahorses are vertically oriented animals, so the vertical space of the aquarium will get just as much use as the horizontal space. A 40 gallon tank is a suitable home for 3 or 4 seahorses. A temperature range of 72-76°F is recommended.

NECESSITIES:

- Appropriately Sized Aquarium
- Filter With Low Water Flow
- Protein Skimmer (Recommended)
- Plants and Other "Anchors" for Your Seahorse to Grab On To

ACCESSORIES:

- Other Aquarium-Safe Decorations

I had a great week of fishing. I chased more walleye on Moses Lake, and even got a day of fly fishing on a lake. I also brought the new boat provided to me by Bob Feil Boats and Motors home, and it will be out on the water very soon.

My friend James Lebow got a report of good fishing at the top end of Moses Lake earlier this week, so he got me and another fishing friend Ryan Harris to join him to see if we could get some walleye. Connelly Park had been closed on Mondays and Tuesdays through the month of April, so we took

off from Blue Heron Park. It's about a 20 minute run at high speed to the fishing area, but we figured it would be worth it. We put our bottom bouncers on side planers out in about five feet of water and started trolling a path that had traditionally produced walleye in the early season. Water conditions were still good here. The weeds weren't up yet and this part of the lake, which warms up early, hadn't turned over. We did have a stiff breeze to contend with and the water temperature was down four degrees from the last time we fished here, about four days prior. Due to the wind, it was difficult to see when we got a bite on the planers. We repeatedly reeled to check our baits for weeds and found our night-crawlers chewed in half or completely gone. We did get four fish in the live well, losing one nice one at the boat and tossing a small fish back. I know that the fishing here will be good on a clear and sunny day. It could be good for quite a while longer, since the water temperature is staying cool. When the weeds come up and the lake turns over at this very shallow end, you can just move into deeper water to find the walleye. I also like to fish for smallmouth bass on Moses Lake and when the water gets a little warmer they will really get active. I have caught some dandy pre-spawn smallmouth on Mo-

ses in the spring.

My very good fishing friend Jim Passage called a couple of months ago telling me to save the date of April 30th for a trip to Hole in the Wall, a private lake managed by our mutual friend, Darc Knoble at the Desert Fly Angler in Ephrata. The lake is known for very good numbers of rainbow trout that are often over 18 inches. Jim brings his small aluminum boat and navigates with an electric motor out the back. He fished while I fumbled around in the bow. I had heard that a large brown fly was working, and I found a couple that

the trout loved, but I couldn't hook 'em. Jim landed fish after fish while I tried to find a pattern that the fish would hit and stay on the hook. We had every kind of spring weather we can get here in Central Washington. That means from warm sun to snow! I took a shore video of Jim laughing while reeling in a nice rainbow. The fishing really was amazing. Our flies were constantly getting whacked, and I don't think we landed a fish under 18 inches. I want to thank Jim for another great day of fishing and companionship. I can't wait to get him out on my new boat for some big kokanee.

I picked up the new boat that Bob Feil Boats and Motors is having me drive this season. Man, it is a beauty. It's a 21 foot Smoker Craft Phantom with the off shore bracket and it has what is called a half hard top. The cover is fabric and tall enough to walk

under without stooping. There is full cover and enclosure, for the chilly weather in the winter. The cover will also provide shade on the hot summer days we have here. There's a Mercury 250 horsepower motor and a 9.9 kicker on the bracket, and a Minn Kota Ultera on the bow. I will be easy to spot on the water. The boat has a full wrap with logos. The boat was debuted in the Classy Chassis Parade last Friday, and then I pulled it home to load up all the stuff I took out of the last boat I was driving for Bob Feil. I have a few things to add to the boat and break in the motors and then decide which species I

am going to chase for the first time. It will either be Lake Chelan kokanee or walleye on Moses Lake. Look for me on the water! This week's photo was taken of the new boat while I was waiting in line for the parade.

I don't know if you are in the habit of checking the videos I have posted on the Dave Graybill channel on YouTube, but I have put some new ones

on the channel recently. There's one on Billy Clapp that shows where I like to fish for trout and walleye. There is also a short one on fishing for walleye in Lind Coulee. If you would like to learn more about the lakes in the Quincy Wildlife Area, you might enjoy the one that I did earlier this season. On the opening day of lowland lake trout fishing, I traveled to several very popular lakes in Grant County. The lakes included in this video are Blue, Park, Vic Meyer, Deep and Perch lakes. I have a lot of fun shooting these videos and I hope you find the information provided in them helpful on your fishing adventures.

As soon as I have the batteries fully charged and the motors broken in I will be out on the water gathering info on the area's best fisheries. Can't wait to get started!

WEEKLY Horoscopes for May 9 - May 15

ARIES – Mar 21/Apr 20
Aries, a friend of has made steady progress and exhibited significant personal growth. Continue to support this person's pursuits and act as a source of encouragement.

TAURUS – Apr 21/May 21
Your happiness can bring joy to many other people this week, Taurus. Spread all of your positivity among those people who can use it the most. You will reap rewards as well.

GEMINI – May 22/Jun 21
The people around you may be behaving in interesting and unexpected ways, Gemini. You don't know what to make of this just yet, so sit back and watch the show.

CANCER – Jun 22/Jul 22
Cancer, it is challenging to keep up with all of the comings and goings of the people in your social circle. It may take a little while for you to reconnect.

LEO – Jul 23/Aug 23
Let others see a side of you that you don't often share, Leo. It is alright to be vulnerable at times, and this vulnerability actually may appeal to some new people in your life.

VIRGO – Aug 24/Sept 22
Virgo, you have a tremendous amount of power at your disposal this week. You should use all of it wisely and not waste a drop. Others will be affected by your presence.

LIBRA – Sept 23/Oct 23
Libra, expect to spot trouble on the horizon before other people around you. This gives you a head-start to take action and prepare yourself and others for what's to come.

SCORPIO – Oct 24/Nov 22
Pay careful attention to any and all financial transactions you make this week, Scorpio. You want to keep tabs on where your money is going and avoid as many mistakes as possible.

SAGITTARIUS – Nov 23/Dec 21
Sagittarius, a situation may arise this week in which you are expected to do more than you feel comfortable. Don't let others bully you into action. Explain your hesitation carefully and respectfully.

CAPRICORN – Dec 22/Jan 20
What is the point of power struggles if it alienates all of the people closest to you, Capricorn? Sometimes you must forego ego to maintain personal relationships and family harmony.

AQUARIUS – Jan 21/Feb 18
Aquarius, try to interact this week with the people who may not necessarily agree with you or share your beliefs. It could be good to see things from different perspectives.

PISCES – Feb 19/Mar 20
Positive energy is circling around you this week, Pisces. Those good vibes will put you in a mood to reach out to some people in your life who may have drifted away.

Cooking Safety

Cooking brings family and friends together, provides an outlet for creativity and can be relaxing. But did you know that cooking fires are the number one cause of home fires and home injuries? By following a few safety tips you can prevent these fires.

COOKING & KIDS

Have a "kid-free zone" of at least 3 feet (1 Metre) around the stove and areas where hot food or drink is prepared or carried.

FACTS

- ! The leading cause of fires in the kitchen is unattended cooking.
- ! Most cooking fires in the home involve the kitchen stove.

"COOK WITH CAUTION"

- Be on alert! If you are sleepy or have consumed alcohol don't use the stove or stovetop.
- Stay in the kitchen while you are frying, boiling, grilling, or broiling food. If you leave the kitchen for even a short period of time, turn off the stove.
- If you are simmering, baking, or roasting food, check it regularly, remain in the home while food is cooking, and use a timer to remind you that you are cooking.
- Keep anything that can catch fire — oven mitts, wooden utensils, food packaging, towels or curtains — away from your stovetop.

If you have a small (grease) cooking fire and decide to fight the fire...

- On the stovetop, smother the flames by sliding a lid over the pan and turning off the burner. Leave the pan covered until it is completely cooled.
- For an oven fire, turn off the heat and keep the door closed.

If you have any doubt about fighting a small fire...

- Just get out! When you leave, close the door behind you to help contain the fire.
- Call 9-1-1 or the local emergency number from outside the home.

REPUBLIC'S EAGLE TRACK ANNOUNCES 2024 SCHEDULE

REPUBLIC, Wash. — Eagle Track Raceway will get racing going a little earlier than planned.

Under new management under the Eagle Track Racing Association, the nearly 70-year-old 3/8's mile dirt racetrack will have its initial 2024 event May 25 according to the schedule just released. Early estimates suggested a June opening.

Racing will consist of Fever 4's, Super Stocks and Modifieds with possibly a Hornet class, a track Facebook post noted.

"Great workday at the track," was another post. "Was able to get the track smoothed back out and some bigger rocks removed," it added.

Two more workdays where volunteers are encouraged to attend will take place May 11 and May 18.

"We still have some repairs that need to be made on the guardrails, and a few other little details to be able to race on the 25th," the post continued.

Nine more race dates are on the schedule including a mid-season championship (July 27) and season championship Oct. 12.

Following uncertainty on operation when former track promoter Jason Pestka decided to no longer operate the track, Ferry County Commissioners agreed on April 8 to let ETRA operate the track which the

county owns.

It was Eagle Track Racing Association that is the group which built and started the track decades ago according to Wendy Braun who is spearheading opening the track.

ETRA is a non-profit organization composed of officers and a board of directors.

The association has been behind a myriad of upgrades and improvements over the years. Back in 2015 the ETRA did all the upgrades around the track including new buildings and added more spectator parking, moved and enlarged the pit area.

Gates open at 10 a.m. and racing begins each day at 2 p.m. Admission is \$10 for adults, \$8 for seniors/military with 12 and under free.

Further information is available by visiting the track Facebook page.

Racing returns May 25 at Eagle Track Raceway in Republic. Eagle Track photo

WALLA WALLA OPENER WINNERS

WALLA WALLA, Wash — Walla Walla Drag Strip announced winners from their season opener on April 28. They include:

- Super Pro:** Justin Cooper
- Pro:** Kasey Kelty
- Sportsman:** Grady Halverson
- Bike/Sled:** Clyde Reeves
- Jr Thunder:** Adam Upton
- Jr Lightning:** Dalton Olson
- Jr Street:** Belle Contreras

Medical Lake's Justin Cooper launches off the line during the April 28 season opener at Walla Walla Drag Strip. Cooper was the Super Pro winner that day. Walla Walla Drag Strip photo by Doug Crann

NASCAR AT KANSAS HAS THEIR PHOTO-FINISH, TOO

KANSAS CITY, Kansas — The Kentucky Derby was not alone with photo finishes last weekend.

The NASCAR Cup Series experienced the closest finish in its history as Kyle Larson took the win in Sunday's AdventHealth 400 at Kansas Speedway.

Larson officially won by a mere 0.001 second — just shy of an inch — ahead of Chris Buescher in the closest finish in the history of the series.

The finish was so close that timing and scoring initially had Buescher as the winner, but after further inspection of the replay video, NASCAR determined that Larson narrowly crossed the line first in the No. 5 HendrickCars.com Chevrolet

Camaro ZL1.

What made the victory, which came in overtime following a late caution, sweeter was Larson landed third in the two-lap dash to the checkered flag.

Kyle Larson sticks the nose of his HendrickCars.com Chevrolet Camaro across the line. NASCAR Photo

May GARDENING TIPS

Master Gardeners of Spokane County

PLANT VEGGIES

Daytime air temps are favorable; nighttime temps are getting warmer and so is the soil. Our last average frost date is May 15. Prepare your vegetable beds and get ready to plant tomatoes, root crops, leafy greens & more!

DIVIDE PERENNIALS

Now is a good time to divide perennials that have grown too large for their space or if you want to move plants around your garden. Depending on the plant, there are several ways to do this job.

NURTURE BENEFICIALS

Many insects and other small creatures are desirable to have in your garden. Take special care to provide food, shelter and water. Avoid using broad spectrum insecticides that kill even the good guys!

How Much Water Does My Lawn Need?

Living in the Pacific Northwest we see drastic changes in weather in short periods of time. In the past I would set my automatic sprinkler system to a basic schedule and just hope that I was getting enough water to my lawn without over watering.

Recently I sat down with a friend who has a lawn that looks like a golf course. Some people are into gadgets, cars, home electronics...this guy is all about his lawn. He has charts pinned up by his sprinkler control box that dictate how much water the lawn needs at what temperature.

He even sent me his PDF file to help me create my own watering schedule.

In the charts below, the watering time assumes that you are getting about a 1/4" of coverage for every 15 minutes of watering, to figure out how much water your sprinkler system is putting out, grab a bowl, set it somewhere on your lawn, preferably about mid stream of a sprinkler head, but not in an area that is being overlapped by another sprinkler head. Wait about 10 minutes, then measure the level or water in the bowl to calculate your water output.

Also bear in mind that this chart does not calculate rainfall, during times where you are getting decent rainfall, you can minus that rainfall from the amount of water your lawn needs for the week, this is important for conserving water and keeping your water bill low.

What is the best time to water? Watering early in the morning minimizes evaporation and wind interference, while an additional late afternoon watering session during extreme heat can help cool down the grass.

While my friend does not have any degrees or science background, what he does have is an amazing lawn, so I tend to think that the research he has done on Google may be valid. I'm going to give this a try this year, and feel better knowing that there is at least some logic to my watering plan.

Watering is only one step towards a beautiful lawn, but considering that my friend talked for 2 beers about watering alone, I was not ready for the information overload he has on grass cutting & mulching, that will be an article for another day.

Cut out and post next to your sprinkler control box

Watering Schedule for 50 - 60°F

Frequency	Amount of Water	Watering Time	Best Time to Water
Once every 5-7 days	1 inch per week	30 minutes	Early morning

Watering Schedule for 61 - 75°F

Frequency	Amount of Water	Watering Time	Best Time to Water
Twice a week	1 to 1.5 inches/week	30 minutes	Early morning

Watering Schedule for 76 - 90°F

Frequency	Amount of Water	Watering Time	Best Time to Water
2-3 times per week	1.5 to 2 inches/week	30-45 minutes	Early morning

Watering Schedule Over 90°F

Frequency	Amount of Water	Watering Time	Best Time to Water
Every other day or daily	Up to 2.5 inches/week	30-60 minutes	Early morning (possibly late afternoon refresh)

SAFER PRODUCTS FOR WASHINGTON, PFAS, AND YOU!

What are PFAS?
PFAS (short for per- and polyfluoroalkyl substances – say that three times fast!) are a group of toxic chemicals often found in items that resist heat, oil, stains, grease, and water. They're known as "forever chemicals" because, well, they stick around for a very long time. PFAS can be found in a lot of products we use every day.

Our approach
The "Safer Products for Washington" program is designed to reduce human and environmental harm by restricting certain toxic chemicals when safer alternatives are available. Where a safer alternative hasn't been identified, we can require manufacturers to report the use of these chemicals.

Through this program, we're reducing PFAS in consumer products. As directed by the Washington State Legislature, we've researched safer alternatives to PFAS in apparel and gear, firefighting PPE, cleaning products, and waxes. We'll continue researching alternatives for waxes, PPE, cookware and kitchen supplies, and hard surface sealants.

We published our draft report illustrating our progress and findings for potential PFAS restrictions in some of these product categories. Scan here to check out our "Safer Products for Washington" report:

It pays to be an AgWest customer-member.

In 2023, our Patronage Program paid 1.25% of daily balances on eligible loans as a cash dividend. This totaled \$387 million returned to customer-members across the West. If you're not receiving a portion of your lender's profits back, it's time to make the switch to AgWest Farm Credit.

Making The Switch: Battery Powered vs. Gas Lawn Mowers

This is the year... I'm done trying to coax one more season of life out of my old lawnmower. While this old gas mower has served me well for the last 15 or more years, I'm finding myself drawn to the new battery powered models. But since I've never owned one, I should probably compare the pros and cons to each to make sure I get the right mower for my needs. I've got a larger yard, it has some little hills here and there and takes on average about 45 minutes to mow the front and back yard.

Knowing this, to fit my requirements I'll need a battery powered model that has enough horse power to cut thick grass and will self propel itself on uneven yards, and a battery that will last for close to an hour. Let's start by first looking at the gas powered mowers.

Side Note: Yes I know all about robotic lawn mowers that will cut the grass on its own, however with the rise of A.I. I don't need another robotic appliance that will eventually rise up as our Computer Overlords and try to exterminate the human race.

Gas Powered Lawnmowers

Pros:

Power and Performance: Gas mowers typically offer greater cutting power, making them suitable for larger lawns and thicker grass. They can handle tougher mowing conditions with ease, including dense or overgrown grass. Newer battery powered mowers can offer the same power on some models, but that is a drain on the battery, meaning I'll need a larger battery, and that comes at a cost.

Unlimited Runtime: Unlike battery-powered mowers, gas mowers aren't limited by battery life. As long as you have fuel on hand, you can continue mowing without interruptions, making them ideal for large properties or extended mowing sessions. I'm not sure I'm up for an extended mowing session... grabbing a cold beer and waiting a half hour for the battery to recharge sounds just fine to me.

Quick Refueling: Refueling a gas mower is a quick and straightforward process. Simply fill up

the gas tank, and you're ready to go. There's no need to wait for batteries to recharge, allowing for continuous use. Keep in mind that quick refueling only applies if you remember to fill the gas can, otherwise it's a trip to the gas station in the middle of your mow.

Longevity: With proper maintenance, gas mowers can have a long lifespan. They are often built with durable components that can withstand heavy use over time, making them a reliable investment.

Cons:

Noise and Emissions: Gas mowers are typically louder and emit exhaust fumes during operation, contributing to noise and air pollution. This can be a concern for users in noise-sensitive areas or those with environmental considerations. While headphones blaring rock music can drown out the noise of the mower, if you're more of a Podcast person, the mower will probably be too loud.

Maintenance Requirements: Gas mowers require regular maintenance, including oil changes, spark plug replacements, and air filter cleanings. They are also more prone to mechanical issues due to their complex engine systems, requiring ongoing upkeep.

Higher Operating Costs: Gasoline is an ongoing

Continued from page 4

expense, and the cost can add up over time, especially if fuel prices fluctuate.

Hospital Bills: While this may not be a consideration to all, if you've ever injured a shoulder trying to pull start your mower, you'll quickly realize the cost of a hospital visit far, far, far exceeds the cost of entry into a deluxe, top of the line, battery powered mower with a push button start. I'm pretty sure there are models that will also pair to your Apple Watch so you can count your steps towards your daily goal... or if you happen to keel over because you're mowing in the 100 degree afternoon sun, then it can alert the proper medical services.

Battery-Powered Lawnmowers:

Pros:

Quiet Operation: Battery-powered mowers are significantly quieter than gas mowers, producing minimal noise during operation. This makes them ideal for residential areas where noise regulations may apply or for users who prefer a quieter mowing experience. If I can mount headlights on the mower I can mow the lawn at 10pm without the neighbors complaining!

Zero Emissions: Battery mowers produce zero emissions during operation, making them an environmentally friendly choice. They help reduce air pollution and greenhouse gas emissions, contributing to a cleaner environment. At least that is what the advertising says, I'm not sure how environmentally friendly it is, but I do know that after mowing the lawn I won't be smelling like the tailpipe of a 1972 Ford Pinto.

Low Maintenance: Battery mowers have fewer moving parts than gas mowers, resulting in lower maintenance requirements. There's no need for oil changes, spark plug replacements, or air filter cleanings, simplifying upkeep.

Ease of Use: Battery mowers are typically lighter and easier to maneuver than gas mowers, making them suitable for users of all ages and physical abilities. They also start with the push of a button, eliminating the need for manual pulling.

Storage: Because these things are not filled with gas, many models simply let you fold the handle down and store them upright, taking up a considerably smaller footprint in your garage or shed.

Cons:

Limited Runtime: Battery-powered mowers are limited by their battery life, which can vary depending on the model and conditions. While some high-capacity batteries offer extended runtime, you may need to recharge or swap batteries to complete larger mowing tasks. Again, it's up to you if you want to buy that second battery, or take the half hour beer break.

Less Cutting Power: Battery mowers may not have the same cutting power as gas mowers, particularly when tackling thick or overgrown grass. While they are suitable for regular maintenance, they may struggle with more demanding mowing conditions. But as with anything, the more money you spend, the more you get, so you can get equal or better cutting power, it just comes at a cost to battery life.

Initial Cost: Battery-powered mowers tend to have a higher upfront cost compared to gas mowers, primarily due to the cost of the battery and charger, the battery alone can easily cost over \$300. However, the long-term savings on fuel and maintenance costs may offset this initial investment over time.

Taking all of this into consideration, I would say the battery powered mower is the way to go. The quiet operation, smaller storage footprint, and not having the pull cord start will far offset the initial startup costs associated with battery powered mowers. Everyone will need to make the choice that's right for them, hopefully this list will help in that decision.

THE PROPERTY SELLER BASICS

HOW TO Hire a Remodeling Contractor

SHOP AROUND FOR THE RIGHT COMPANY

- Get at least 3 written estimates.
- Ask for and check references. If possible, look at jobs the contractor recently completed.
- Check with your local chamber of commerce or Better Business Bureau for complaints.
- Be sure that the contractor has the necessary licenses and insurance, as well as the ability to obtain permits.
- Ask if the contractor's workers will do the entire job or whether subcontractors will be involved.

READ THE CONTRACT CAREFULLY

- Be sure the contract states exactly what is to be done and how change orders will be handled.
- Check that the contract states when the work will be completed and what recourse you have if it isn't.
- Make sure the contract indemnifies you if work does not meet building codes or regulations.
- Be sure that the contract specifies who will clean up after the job and be responsible for any damage.
- Ensure that the materials meet your specifications.

SEAL THE DEAL

- Remember that you can often cancel a contract within 3 business days of signing it.
- Make a small down payment so you won't lose much if the contractor fails to complete the job.
- Don't make the final payment until you're satisfied with the work.
